

APPENDIX E

DSS INFORMATION

**NEW POSITION REQUEST
2011-12**

Department: Social Services

Job Title: Income Maintenance Caseworker II – Work First Family Assistance

Suggested Grade/Step: 12/1

If Full Time position is requested, is it replacing a Part-time position? No

Will the Part-time position be eliminated? N/A

Justification:

This position can be funded with 100% Federal TANF Funds. Each year for past several years the agency has had excess TANF Funds reverted back to the state. Last year there was approximately \$97,000 reverted back and this year (2010-11) approximately \$116,000 will be reverted. This worker would carry all Work First Cash Assistance cases, including Family Assistance and child only cases, as well as transitional Medicaid. Currently two workers in the Family and Children's Medicaid Unit determine eligibility and carry child only cases, as well as a partial caseload of Family Medicaid. The funding of this position would allow us to position Work First services in one unit providing more consistency in providing services and enhanced services provided to child only cases. It would also allow us to take one of the positions that currently carry a Work First/Medicaid caseload to a full Medicaid caseload of 1187 (comparable to other F & C Medicaid caseloads) and the other one to another unit of the agency. Currently all income maintenance units carry excessive caseloads above recommended standards and moving one of these positions would improve service delivery in two other areas. Since all income maintenance administration is reimbursed at 50% no additional cost would be incurred.

Currently the WFFA is structured as follows:

Three social workers- One social worker works solely with the employment services side for the parent cases receiving Wffa. The other two social workers take eligibility applications for the parent Wffa cases and continues to maintain these cases until terminated and retain the employment cases that are job coded as disabled parents. They also evaluate clients for the Emergency Assistance program and 200% Retention program.

Two Income Maintenance caseworker positions take child only applications and share case management responsibility of 163 child only cases and 1187 Family Medicaid cases.

With the addition of the new TANF position the unit would be structured as followed:

Three social workers - One social worker will continue to work solely with the employment services side of the parent cases receiving Wffa. The other two social workers would take applications for the Emergency Assistance program and 200% Retention program and be able to assist the other social worker with employment caseload and home visits on the child only cases. This should enable us to provide these clients with additional benefits that we've been unable to do at this time. These two social workers will also help back up the Income maintenance caseworker in taking applications when needed.

One Income Maintenance caseworker will carry all the Wffa child only and parent cases. This caseworker will also take all Wffa applications and determine eligibility and carry the Transitional Medicaid cases.

NEW POSITION REQUEST

Department: Social Services

Job Title: Income Maintenance Caseworker II – Food and Nutrition Services
(2 Positions)

Suggested Grade/Step: 12/1 - \$27,806.20

If Full Time position is requested, is it replacing a Part-time position? No

Will the Part-time position be eliminated? N/A

Justification: Since January 2005 Food and Nutrition households have increased by 1,203. Rutherford County DSS FNS caseloads have increased 126% since 2005 with no additional budgeted staff for this program. Between FY 05-06 and FY 06-07 the number of individuals and households receiving Food and Nutrition Services remained relatively stable with a decrease of less than 1%. Similarly the average annual county unemployment rate has increased from 8.6% in 05-06 to 13.8% in 09-10. This is an obvious sign of the declining economy and increased need for nutritional supplementation. The agency has made efforts to increase our participation rate to target all potential eligible citizens by a successful rate of 118% based on the 2000 census. This participation rate exceeds the states expectations. Both of these trends, in addition to indicating a declining economic climate in the county, contribute to the increase in recipients over the past five years.

Our caseloads still continue to exceed the state's recommendation and of surrounding counties and those of comparable size. Rutherford County caseworkers are currently maintaining an average of 814 cases in addition to taking and processing applications. They take and process an average of 374 new applications per month. Burke County's workers maintain an average of 617 cases in addition to intake and processing; McDowell County average 750 cases; Craven county averages in the 500's as well as Johnston County. Harnett County averages in the 650 range and Cleveland County averages 583 cases and operates with the Northwood's system.

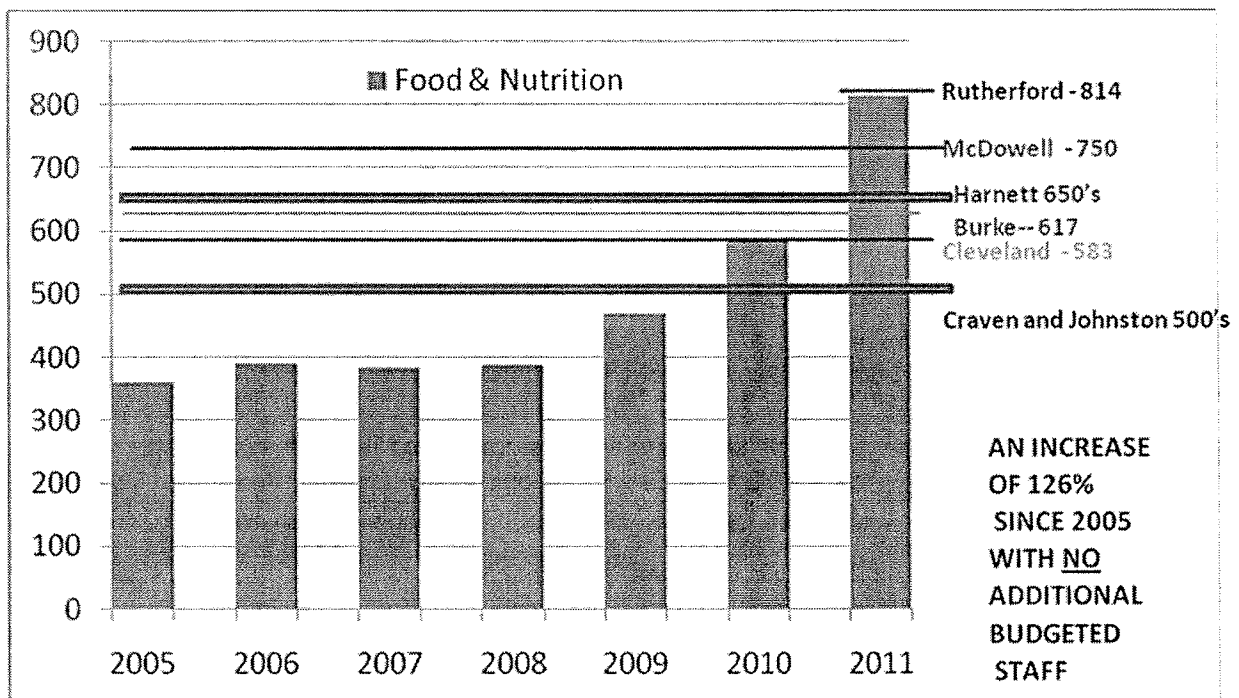

In addition to maintaining high caseloads Food and Nutrition Services policies have become more complex and time consuming over the past several years. In July 2010 the state increased the income limit from 130% of the poverty income limit to 200%. The state also implemented the exclusion of resources for this program for the majority of the households. This change alone has significantly increased the caseloads and changed the clientele for this program. We feel with the implementation of Northwood's caseworkers will improve management of their cases but remain understaffed compared to other counties.

Due to high caseloads and the extra work created by policy changes, two caseworker positions are needed in order to maintain the high quality work that is being performed

currently. With two additional staff members we would average approximately 650 cases still remaining higher than some of our neighboring counties.

In order to maintain caseloads and meet deadlines these staff members frequently work beyond the standard work week of 37.5 hours. Currently our FNS staff has 175 hours overtime pending. An additional caseworker would allow us the opportunity to be proactive in preventing costly errors, decreasing staff overtime/comp time, retaining competent staff, and ensuring that all applicants receive the benefits that they are eligible for without delay.

F&N Compared to Neighboring Counties

NEW POSITION OR POSITION RECLASSIFICATION REQUEST (New Position)

Department: Social Services

Job Title: Custodian

Suggested Grade/Step: 6/1

If Full Time position is requested, is it replacing a Part-time position? Yes

Will the Part-time position be eliminated? Yes

Justification: The DSS Building has a high volume of traffic each day, with appropriately 2300 visitors a month to the main lobby; in addition the building houses appropriately 114 employees who utilize two kitchen areas, four restrooms and 2 medium size conference rooms. In addition there are four public restrooms. Due to this volume of traffic it is difficult to keep the restrooms, kitchen, and lobby areas clean and sanitary without daily maintenance. Currently there is a housekeeper assigned from the county maintenance department 2 days per week and 1 hour on Friday. With the limited time devoted to housekeeping in a building this size there are cleaning duties that must go undone due to lack of time, thus the building does not always present as clean and orderly. DSS also currently employs a part time General Utility Worker who works 29 hours per week. A housekeeping position would replace both the housekeeper and the General Utility Worker position. This would give the Maintenance Department the ability to assign the housekeeper to another department or area at no additional cost. Currently Maintenance needs a custodian at two other locations. This would help them partially meet that need. Eliminating the General Utility Worker position the approximate cost to the county for a full time housekeeping position would be \$4,634.00 over current cost.

The Northwoods Project

A Process Management System

By: Rutherford County DSS

Presentation Objectives

- Highlight the significant financial impact DSS revenues have on the Rutherford County Community.
- Review case load increase statistics across programs.
- Show potential cost risk avoidances using Northwoods.
- Explain how new mandated State programs affect DSS resources.
- Present Northwood's benefits to DSS.
- Overview of system cost.
- Show Return on Investment (ROI).

Project Goal

- ❖ Implement a system that will provide:
 - ✓ Significant productivity and automation improvements.
 - ✓ Reduce operational expenses.
 - ✓ Improve customer service levels.
 - ✓ Provide caseworkers with necessary tools to effectively handle above recommended caseloads.
 - ✓ Achieve an ROI of 2 years or less.

2009 DSS Revenues

Total DSS Revenues
\$76,060,648.00

■ Food and Nutrition

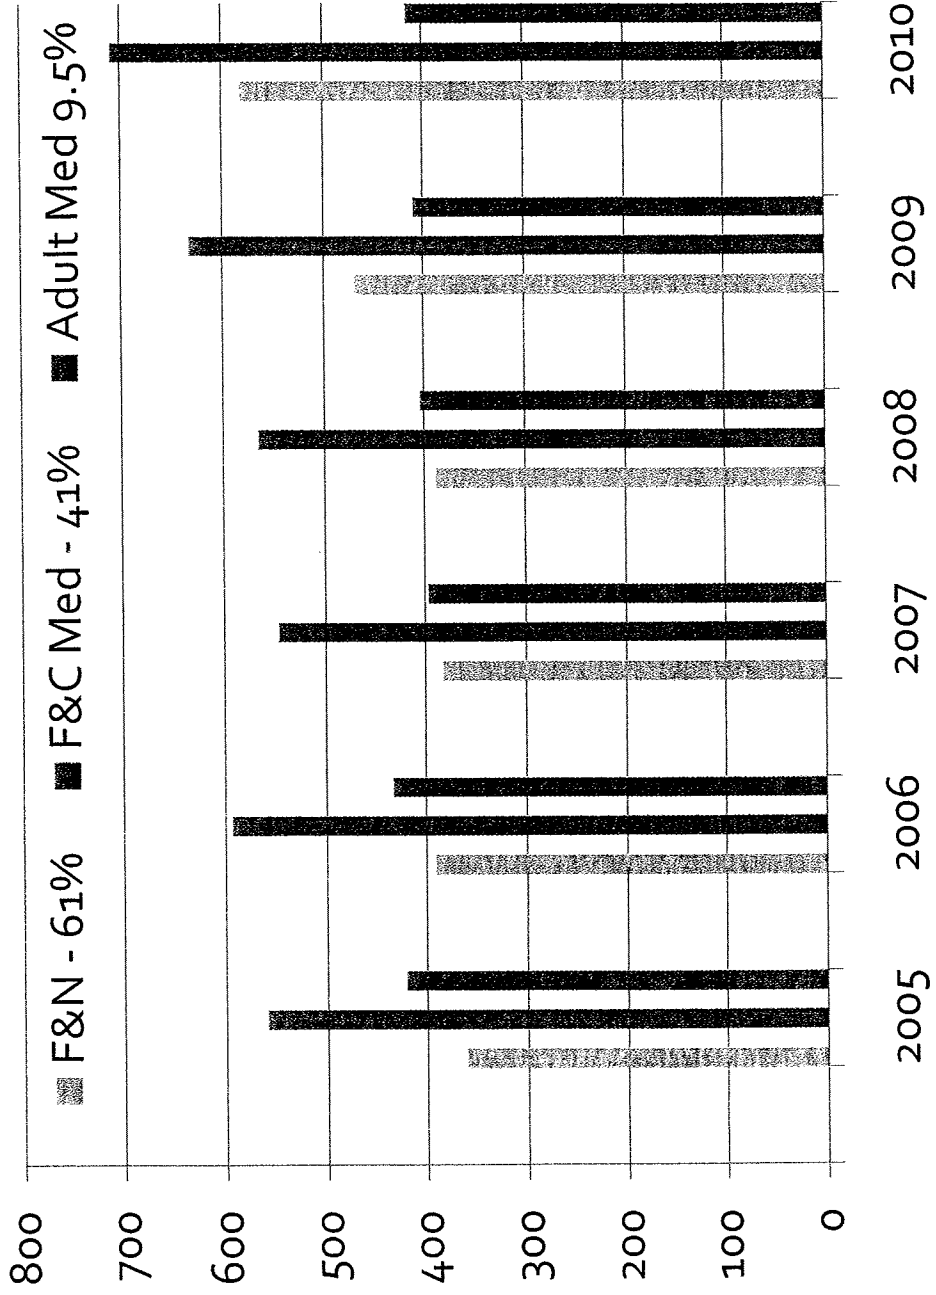

■ WFFA

■ LIEAP

Major County Revenue Recipients

Income Maintenance Caseload Increases

Food & Nutrition Average Worker Caseload

F&C Medicaid Average Worker Caseload

Cost Risk Avoidances

- Federal penalties due to missed deadlines.
- State charge backs due to administrative errors.
- Corrective action due to failing management evaluations.
- Public law suits due to poor customer service.
- Loss time due to repetitive work related to case management.
- Workers compensation claims due to crowded workspace.
- Staff turnover related to excessive workload.
